IELTS GENERAL TRAINING PREPARATION SYSTEM

Day 04: Section 3 Multi-Speaker Dynamics & GT Reading Headings

Focus: *Multi-speaker dialogue, academic projects, and matching paragraph headings |* ***Regular Time:*** *85 Minutes |* ***Busy Day:*** *30 Minutes (Reading Headings + Vocab)*

EXAMINATION STRATEGY OF THE DAY

Examiner Strategy: Matching Headings Without Reading Every Word
Do not read the whole paragraph 3 times! Read sentences 1-2 to identify the topic sentence, scan the final sentence for conclusions, and ask: *What is the main point?* Eliminate headings that only capture one minor detail.

MODULE 1: Listening Section 3: Retail Marketing Research Project

Audio File: *audio_track.wav (Located in this day's folder) | Answer Questions 1-10 with NO MORE THAN TWO WORDS AND/OR A NUMBER.*

Q1 Initial survey sample size: _____ shoppers

Q2 Originally predicted top impulse item: confectionary and _____

Q3 Over 60% of unplanned purchases were actually household _____

Q4 Shopper navigation tracking methodology used: observational _____

Q5 Duration of observational tracking: _____ days

Q6 Primary ethical requirement: customer identities had to be _____

Q7 Medium used for recording observations: _____ recordings

Q8 Where statistical analysis must be located in report: _____ section

Q9 Section where stats should NOT be relegated: the _____

Q10 Project topic: retail _____ in supermarkets

MODULE 2: GT Reading Section 3: The Evolution of Modern Office Design

Passage 1:

Paragraph A: For much of the twentieth century, white-collar workplace architecture was dominated by cellular layouts. Individual offices with solid walls and closed doors were considered the hallmark of professional status and focused intellect. Acoustic privacy was prioritized above all else, ensuring that managerial deliberation occurred in seclusion while junior clerks performed repetitive accounting in separate typing pools.

Paragraph B: The 1960s witnessed the inception of the open-plan office, originally conceived in Germany as 'Bürolandschaft' (office landscape). Proponents contended that dismantling physical partitions would democratize corporate hierarchies, inspire organic interaction, and dramatically curtail construction and maintenance costs. By the late 1990s, cubicle grids and open desks had become the ubiquitous standard across global corporate headquarters.

Paragraph C: In recent years, however, extensive empirical research has revealed the unintended shortcomings of open-plan workspaces. Far from fostering seamless collaboration, open designs frequently induce cognitive exhaustion and heightened anxiety. Constant acoustic interruptions—ringing telephones, conversational chatter, and mechanical hums—severely diminish employee attention spans. Studies demonstrate that face-to-face interactions actually decreased by roughly 70% in open environments, as workers retreated into noise-cancelling headphones and internal messaging software.

Paragraph D: In response to these shortcomings, modern architects are championing 'activity-based working' (ABW). Rather than assigning fixed desks, the contemporary workplace is segregated into modular zones tailored to distinct occupational functions. Quiet focus pods provide acoustic isolation for intensive cognitive tasks, communal lounges facilitate spontaneous brainstorming, and soundproofed booths accommodate virtual teleconferencing. This hybrid architectural paradigm acknowledges that workplace productivity demands a dynamic equilibrium between solitude and social synergy.

Q1 Match Heading for Paragraph A: (Choose: i. Financial drawbacks of partitions / ii. The cellular status era / iii. The rise of hybrid layouts)

Q2 Match Heading for Paragraph B: (Choose: iv. The democratic promise of open plans / v. Acoustic engineering solutions)

Q3 Match Heading for Paragraph C: (Choose: vi. Counterproductive consequences of openness / vii. Telecommuting trends)

Q4 Match Heading for Paragraph D: (Choose: viii. Activity-based zoning for modern balance / ix. Eliminating shared spaces)

Q5 Face-to-face interaction in open-plan offices dropped by approximately [_____] percent.

Passage 2:

Questions 6-10: Sentence Completion:
• Early cellular offices valued acoustic [6. _____] above other architectural features.
• The open-plan concept was originally developed in [7. _____].
• Employees in noisy open environments often cope by wearing [8. _____] headphones.
• Under activity-based working, employees do not have [9. _____] desks.
• Quiet focus pods are specifically designed to provide acoustic [10. _____].

Q6 Complete Question 6

Q7 Complete Question 7

Q8 Complete Question 8

Q9 Complete Question 9

Q10 Complete Question 10

MODULE 3: WRITING PRACTICE

Task 1 Bullet Point Balancing Drill:
Prompt: You have rented a flat through an estate agent, but upon moving in, you discovered multiple issues. Write a letter to the agency manager.
• Explain the terms of your rental agreement.
• Describe the specific defects found in the property.
• Outline what corrective steps you require within 48 hours.
Write an outline showing how you balance all 3 bullet points with 2 specific details each.

MODULE 4: SPEAKING PRACTICE

Speaking Part 2 (Cue Card Practice — 2 Minutes):
Describe an educational course or training program that you found particularly useful.
You should say:
• What the course was and where you took it
• What skills or knowledge you acquired
• How the teacher or instructor delivered the content
• And explain why this course was beneficial to your career.

DAILY COMPLETION CHECKLIST:

[ ] Completed Listening using audio_track.wav without checking answers prematurely.
[ ] Completed Reading questions within the designated time window.
[ ] Drafted Writing response or recorded Speaking audio.
[ ] Compared answers against Answer_Key.pdf.
[ ] Logged all incorrect answers into ERROR_LOG.xlsx with root cause classification.
[ ] Submitted writing/speaking in chat for formal line-by-line examiner assessment.
